Customer-Focused Introduction

At AGRILIMA TECK, we believe that better farming starts with better solutions. We are a growing mixed farming enterprise based in Laikipia East, Laikipia County, dedicated to providing customers with fresh agricultural products, practical farming knowledge and reliable agricultural services.

Our farm produces fresh vegetables, tomatoes, onions, milk and eggs for the local market. Alongside production, AGRILIMA TECK provides farming consultations and technical services, including irrigation system installation, helping farmers improve productivity and make better use of available resources.

We focus on practical, affordable and sustainable solutions. Whether a customer needs fresh farm produce, advice on improving a farm, or support with an irrigation system, AGRILIMA TECK aims to provide dependable service and value.

Our approach is guided by sustainable and organic-oriented farming practices, with the belief that healthy soil, responsible farming and quality food contribute to healthier communities and a better future.

Business Overview

AGRILIMA TECK is a mixed farming enterprise established in 2026 and managed by Peter Migwi Mwai. The farm operates on approximately 9 acres and combines crop production, livestock and poultry activities with agricultural consultancy and irrigation services.
